Skalini

We are not just an ordinary tile company. Our industry experience is exceptional, we have been working with natural stone for many years. An innovative approach and strong knowledge of the market trends allow us to manufacture and customize exceptional products, making us your go to company... In 2012 we made an important decision to switch our path from just a mosaic manufacturer to the trendsetter in our field. This created the birth of our new brand, Skalini. Many years of experience, the newest technologies and an exceptional design team altogether allowed us to create a totally new and out of the box product line. Our team of designers in cooperation with a group of engineers created a product line that will fill its unique niche in the marketplace.

COLLECTION

W A T E R J E T
C O L L E C T I O N

We have created an innovative collection with a wide range of design patterns, applying traditional essences with sleek modern lines. The design features of water jet allows you to achieve an artisan, yet sophisticated finish, combining modern production techniques with the beauty of ancient craftsmanship. The combination of design and creativity will definitely make that stunning statement.

** Variation in color, shade, finish, hardness, strength and slip resistance is inherent in Natural stone products. White marbles contain naturally occurring deposits of iron which may lead to discoloration of marble and turning it yellow-rust or grey if used in wet areas. This a natural characteristics of the stone and that is why it cannot be considered as a defect in the product. MIR Mosaic is in no way responsible for discoloration of the natural stones.*

STONE
M O S A I C

Natural stone processing traditions have centuries old history in Italy and as in the old days, Italian artists continue to amaze the world with new discoveries in the art of processing stone surfaces. Artistic Stone collection represents the most vivid and extraordinary part of Skalini. The latest technologies are combined here with the distinguished design solutions. The chord of bright colors and exquisite ornaments will never leave you indifferent. Skalini designers made sure that these products will meet all your needs in creating designs in your own unique way.

WATER-JET COLLECTION

Mosaic Maintenance and Installation Guide

The Water-Jet Collection we have created is an innovative collection with a wide range of design applying traditional essences with sleek modern lines. The design features of water jet allows you to achieve an artisan, yet sophisticated finish, combining modern production techniques with the beauty of ancient craftsmanship. The combination of design and creativity will definitely make a stunning statement. Our water-jet collections uses natural stone, glass and mother of pearl materials. Natural stone is a product of organic formation and will have a color and size variations, blemishes and chipped edges. No two pieces are exactly identical lending to the beauty and prestige of these materials.

Inspection:

Always inspect your tiles before they are installed, as **installation of material constitutes acceptance**. Any questions as to acceptability must be resolved before installation. Always layout your material prior to installation to ensure the appearance meets desired results. Mir Mosaic is in no way responsible for the installation of our tiles or thereafter. The responsibility for correct installation rests with the end user. Some may be susceptible to scratching in handling, installation and use. Expect a slight color variation from production run to production run.

Usage:

- Interior/Exterior walls (some items may not be suitable for exterior use)
- Back splashes
- Shower walls/floors (some items may not be suitable for shower pan use)
- Light/Medium/Heavy foot traffic
- **NOT** recommended for swimming pools or areas submerged in water for prolonged period of time.
- **ALWAYS** - refer to the Mir Mosaic product guide provided in the catalog or website to determine suitability for your desired installation. Some collections may not be suitable for all areas listed above.
- For areas exposed to extreme temperature such as fireplace hearth or behind cook top contact Mir Mosaics at: info@mir-mosaic.com for additional information on usage.

Installation:

To prolong the life and beauty of your installation, it is best to secure a licensed installer familiar with the industry standards established in the NTCA, ASTM, M.I.A. and ANSI handbooks for tile and trade installation.

Due to the natural character of stone products, it is very important that the proper installation and methods are used according to the relevant industry standards. For specific questions or accepted industry standards, refer to the Marble Institute of America (www.marble-institute.com).

Natural stone may vary in absorption. It is recommended to pre-seal stones prior to installation. This will help prevent setting materials and grouts from staining the surface of the stone. Penetrating type sealers that leave the material looking natural are recommended for this purpose. Suggested sealer brands include but are not limited to: Dupont™ Stonetech® Professional Sealer and Aqua Mix. Please refer to sealers Manufacturer instructions prior to sealing. Test in a small area before sealing entire surface to ensure suitability. Contact your purchase location for additional information on these types of sealers.

We recommend installing stones over a clean, sound, and flat concrete or mortar substrate. The surface should be free of contaminates or any condition that could compromise the bond of the tile.

Use a high quality, well maintained wet saw with a diamond blade designed for cutting stone materials. Using a poorly maintained tile saw or a blade will cause the tile to chip during cutting. Always cut tile very slowly to avoid chipping.

Grout joints should be packed full and free of all voids and pits. Excess grout should be cleaned from the surface as the work progresses, while grout is fresh and before it hardens. Prior to grouting, test in a small area to make sure that the right color grout is chosen and that the surface does not scratch during grouting.

Suggested setting materials include but are not limited to:

- LATICRETE PERMACOLOR® Grout
- LATICRETE Tile adhesive Mortar or Laticrete 220 Marble & Granite Mortar or similar products.

MAINTENANCE

Stone is a natural product and care should be taken to maintain its lasting beauty. To maximize the life of your mosaic and retain its artistic integrity, please consider the following:

- Use only a mild, pH-neutral detergent cleaner and damp sponge or rag to clean your mosaic.
 - **Do not** use acid, alkaline, and solvent-based cleaners. They can damage and/or discolor the tiles and the grout.
 - **Do not** allow soap, bleach or other cleaning solutions set on the surface.
 - **Do not** wax any part of your mosaic.
 - **Do not** let stains sit on your mosaic's surface for extended periods. Clean promptly.
- Acceptable cleaners for natural stone surfaces may be acquired through your Mir Mosaic purchase location or other tile dealers.

Always test cleaner in a small inconspicuous area prior to use throughout the installation to determine suitability and use of care and maintenance products.

WARRANTY

MIR Mosaic makes no warranties, express or implied, including merchantability or fitness for a particular purpose. Purchaser's remedy is limited to replacement or refunding the cost of defective material which has not been installed or altered in any way, and under no circumstances shall MIR Mosaic be liable for any loss or damage arising from the purchase, use, or inability to use this product, or for any special, indirect, incidental, or consequential damages. No installer, dealer, agent, or employee of MIR Mosaic has the authority to modify the obligations or limitations of this warranty.

ARTISTIC STONE COLLECTION

Mosaic Maintenance and Installation Guide

The Artistic Stone Collection is decorative mosaics comprised of various mixed materials. Combinations may include glass and stone, stone and metal, polished and honed stone. Natural stone is a product of organic formation and will have color and size variations, blemishes and chipped edges. No two pieces are exactly identical lending to the beauty and prestige of these materials. Coupled with the various mixed media, these collections transpire to luxury.

Inspection:

Always inspect your tiles before they are installed, as **installation of material constitutes acceptance**. Any questions as to acceptability must be resolved before installation. Always layout your material prior to installation to ensure the appearance meets desired results. Mir Mosaic is in no way responsible for the installation of our tiles or thereafter. The responsibility for correct installation rests with the end user.

Usage:

- Interior walls
- Back splashes
- **Materials NOT** recommended for swimming pools or areas submerged in water.
- **Materials NOT** recommended for use in direct sunlight as fading may occur.
- **Use of adhesive tapes such as masking tape, blue tape, painters tape, duct tape is not recommended during or after the installation process. These adhesives may adversely affect or damage the appearance of the Artistic Stone Collection**
- **ALWAYS** - refer to the Mir Mosaic product guide provided in the catalog or website to determine suitability for your desired installation. Some collections may not be suitable for all areas listed above.
- For areas exposed to extreme temperature such as fireplace hearth or behind cook top contact Mir Mosaics at: info@mir-mosaic.com for additional information on usage.

Installation:

To prolong the life and beauty of your installation, it is best to secure a licensed installer familiar with the industry standards established in the NTCA, ASTM, M.I.A. and ANSI handbooks for tile and trade installation. Particular care should be taken to use the correct adhesive, grout and sealants. Use only non-sanded grout for grouting Artistic Stone mosaics.

Using wrong setting material can cause damage to the color and beauty of the mosaic. The installer is responsible for choosing and using the correct installation practices to achieve an acceptable finished product.

Usage:

- Interior/Exterior walls/floors
- Back splashes
- Shower walls/floors
- Steam Showers
- Light/Medium/Heavy foot traffic
- **NOT** recommended for swimming pools or areas submerged in water for prolonged period of time.
- **ALWAYS** - refer to the Mir Mosaic product guide provided in the catalog or website to determine suitability for your desired installation. Some collections may not be suitable for all areas listed above.
- For areas exposed to extreme temperature such as fireplace hearth or behind cook top contact Mir Mosaics at: info@mir-mosaic.com for additional information on usage.
